PROFESSIONAL SUMMARY

High-impact Junior Full-Stack Web Developer and Computer Engineering undergraduate specializing in MERN stack architecture, RESTful API design, multi-LLM integrations, and database optimization. Skilled in engineering secure backend microservices, JWT authentication, and automated CI/CD pipelines to deliver high-availability, zero-downtime web applications.

TECHNICAL SKILLS

Languages & Web Tech: JavaScript (ES6+), HTML5, CSS3, SQL, JSON, C, C++

Backend & Frameworks: Node.js, Express.js, RESTful APIs, Microservices, Mongoose ORM, Middleware

Databases & Cloud: MongoDB, Database Schema Design, Render, Netlify, Cloud Hosting, Redis Caching

Tools & AI Integrations: Git, GitHub, Postman, Google Gemini API, OpenAI API, VS Code, npm

WORK EXPERIENCE

Codomax Digital Solutions Pvt. Ltd.

Junior Full-Stack Web Development Intern

Chennai, India (Remote)

July 7, 2026 – August 7, 2026

- Architected full-stack MERN applications using Node.js, Express.js, and MongoDB, handling concurrent user sessions and heavy API traffic.
- Optimized client-side DOM rendering and asset pipelines with modern JavaScript, driving significant web performance enhancements.
- Engineered normalized MongoDB database schemas and indexing strategies to eliminate query bottlenecks and accelerate execution speed.
- Executed rigorous endpoint validation and API integration testing using Postman, preventing server crashes and ensuring uptime.
- Automated microservices deployment workflows using Netlify and Render CI/CD integrations for continuous delivery.

PROJECTS

Multilingual AI Chatbot System (HACKHERTZ 24-Hr Hackathon)

September 2025

- Engineered a real-time, multilingual conversational AI application integrating Google Gemini and OpenAI ChatGPT APIs to process complex multi-language queries.
- Architected persistent session and conversation history tracking using MongoDB, enabling seamless past chat retrieval and contextual continuity.
- Developed optimized backend API endpoints in Node.js/Express to handle dual-LLM fallback logic and reduce user-perceived API latency.

Blog Management System (Full-Stack)

github.com/jainilba7-stack/Blog-Management-System.git

- Engineered a multi-tier content platform with asynchronous REST APIs, processing high-volume article requests with ultra-low latency.
- Implemented JWT authentication and custom Express security middleware to restrict unauthorized access and protect user endpoints.
- Configured automated release pipelines via Git, GitHub, Render, and Netlify, ensuring reliable zero-downtime deployments.

LifeOS Productivity Platform (Full-Stack)

github.com/jainilba7-stack/lifeos.git

- Engineered a full-stack personal organization application utilizing HTML5, CSS3, JavaScript, Node.js, Express.js, and MongoDB RESTful APIs.
- Validated backend REST endpoints and payload structures via Postman, ensuring robust backend-to-frontend API communications.

EDUCATION

Shree Swaminarayan Institute of Technology (Gujarat Technological University)

Bachelor of Engineering (B.E.) in Computer Engineering

Gujarat, India

June 2024 – Present

- Cumulative Grade Point Average (CGPA): 7.8/10.0 | Semester 4 SPI: 7.8/10.0
- Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Web Development.

EXTRACURRICULAR & CERTIFICATIONS

- Hackathon Participant (HACKHERTZ):** Represented Team "Nova" in the 24-hour hackathon at SSIT, building a Multilingual AI Chatbot with Gemini & ChatGPT APIs (Sept 14-15, 2025).
- Full-Stack Web Development Internship Certificate:** Recognized by Ministry of Micro, Small & Medium Enterprises (MSME).
